IDEA Federal (federal IDEA baseline reviewer, Federal) Process Report

PRISMA-style process report on a documentary corpus: the federal IDEA baseline

Author credit: Joseph Castellanos Hoyt. Prepared by the research bot IDEA Federal (role: federal IDEA baseline reviewer; case: Federal).

Report built 2026-10-28 22:02 UTC (2026-10-28 15:02 PDT), from `date -u` and `TZ=America/Los_Angeles date` at the start of the build.

Scope note. This report describes how the federal baseline was built, not what the law means. It is a research process record, not legal advice. It makes no finding that any agency violated any law. Evidence (quoted from files, with file:line pins) is kept apart from inference, and every inference is labeled INFERENCE. Where a count was not kept at the time, this report says NOT RECORDED and does not estimate. All paths are relative to the project root `/workspace/idea-corpus/` unless they start with `/`.

1. The task as briefed

The study asks how child welfare and juvenile justice institutions operationalized the Individuals with Disabilities Education Act (IDEA) for dually involved youth. The cases are Nevada, Georgia, Utah, the District of Columbia, and the federal layer. IDEA Federal's role in the briefing of 2026-10-15 (briefing/BRIEF.md) and in the team consolidation of 2026-10-21 (briefing/TEAM_CONSOLIDATION_2026-10-21.md) was the federal baseline: the federal statute (20 U.S.C. 1400 et seq.), its regulations (34 C.F.R. Parts 300 and 303), related federal law outside IDEA where state rows cite it, key Supreme Court cases, and federal agency guidance. From 2026-10-21 (briefing/PEER_REVIEW_2026-10-21.md) the role also covered a check of every federal-counterpart cell in the state bots' matrices, and from 2026-10-22 the writing of federal counterpart rows for state rows.

Later briefs set further rules: no worker processes and no unofficial sources (briefing/CORRECTION_2026-10-15_2130UTC.md); a 14-column matrix and UTC and PDT stamps (briefing/DIRECTIVE_2026-10-15_2345UTC.md); and, relayed by IDA about 2026-10-22 01:10 UTC, that "a read counts as full only when its quotes carry src line numbers and verify against the captured file" (artifacts/federal/federal_reviewer_log.md:145).

This report answers the brief IDA sent at 2026-10-28 21:57 UTC (14:57 PDT), which relayed the researcher's instruction: write a PRISMA-style process report on finished work, with no new collection and no change to corpus files, for the folder reports/IDEA_Federal/ of the public repository Choytcudz/Research-Bots.

1A. Methodological framework

The work is documentary legal research (Hutchinson & Duncan, 2012) on a corpus of public documents (Bowen, 2009). Coding follows constructivist grounded theory (Charmaz, 2006), extended for legal text: because statutes and regulations are written with action verbs, each provision is coded for actor, action verb, object, trigger, condition and consequence. That scheme

is shared with the sibling state bots so the federal rows can be set beside state rows. The federal baseline index codes 120 C.F.R. rows, 17 statute rows and 4 Supreme Court cases (artifacts/federal/Federal_Baseline_Index_2026-10-21.md:9-133, :134-155, :156-166; the case rows are marked TO CODE).

Reporting borrows the structure of PRISMA 2020 (Page et al., 2021) and the search-reporting items of PRISMA-S (Rethlefsen et al., 2021). Grey-literature practice (Adams et al., 2016; Godin et al., 2015) informs how agency guidance was located and labeled. Trustworthiness is handled by an audit trail and peer checking in the sense of Lincoln and Guba (1985): every quote carries a file:line pin, a script checks each quote against its pinned line, and a separate Process Auditor bot audits the trail.

Status vocabulary for each federal counterpart: SUPPLIED, PARTIAL, NONE FOUND (always with the method used) or UNRESOLVED. Absence of a provision is treated as a lead, not a finding. Labels: "agency guidance, not law"; "agency policy, not law"; and "RELATED FEDERAL BASELINE (outside IDEA)" for ESSA, title IV-E and similar material. Keyword-only results are labeled KEYWORD-ONLY.

Sources counted as primary are official hosts only: eCFR, govinfo, uscode.house.gov, ed.gov, supremecourt.gov, loc.gov, acf.gov and acf.hhs.gov, plus Lexis (not used). Cornell LII, Justia, search snippets and recall are not primary; a claim resting on them is UNRESOLVED.

2. Timeline

Times come from my log and status files, which are quoted in the appendices. PDT is UTC minus 7 hours. Entries on 2026-10-15 printed local time as "PST" at UTC minus 8 (for example "21:27 UTC / 13:27 PST", federal_reviewer_log.md:47); the PDT column below gives the correct local time, and the source lines are left as written.

UTC	PDT	Event	Pin

3. Search strategy, searches and direct fetches

No bibliographic database was searched, and Lexis was not used. The corpus was built by direct fetch of known official documents, by within-corpus keyword searches, and on 2026-10-15 by web search run by a background worker.

Web searches. The query strings, engines and counts were NOT RECORDED. The only logged trace is that the DC hearing officer determination 2020-0181 was "FOUND via search" from "search snippets" (federal_reviewer_log.md:22; also :37). Those log lines were written by the worker and were reclassified UNVERIFIED (federal_reviewer_log.md:48).

Direct fetches with a log row. Every logged fetch is quoted in Appendix C. Counts below are counts of log lines, made with `grep` on 2026-10-28.

Log	What it records	Count
src/usc/CAPTURE_LOG.txt	govinfo fetch lines with HTTP 200 (U.S.C. sections, Pub. L. 113-183)	21
src/usc/CAPTURE_LOG.txt	hash-only lines with no HTTP status (20 U.S.C. 1416 at :17; Pub. L. 108-335 at :24; and companion hash lines)	see Appendix C
src/ CFR_CAPTURE_LOG_GA39_56.txt	rows naming a cfr file (122 distinct names)	127
same	of which HTTP 200 stated	78
same	of which HTTP 404 stated (stub files cfr_229_v2, cfr_2_v2)	2
same	of which HTTP 406 error bodies, disregarded by the correction at :41	4
same	of which no HTTP status recorded (mostly rows 1 to 36)	43
same	supremecourt.gov bound volumes 546 and 548, HTTP 200	2

same	ED/HHS foster care guidance 2016 from acf.hhs.gov, status 200	1
src/ CAPTURE_LOG_guidance.txt	NRG24 row (2026-10-15 fetch status NOT RECORDED; re-fetch HTTP 403)	1
same	CAP-1450, CAP-PI1011, CAP-YUD, CAP-200306 rows	4
same	browser captures fetched by IDA, not by me (NRG24 host match; Letter to Yudien)	2

Captures with no per-file log row. The 2026-10-15 captures were not logged file by file. By filename match, 168 of the 288 held `cfr_*.txt` files have no row in the CFR capture log. The OSEP letter, ED/DOJ principles, ED/HHS 2024 guidance and DC HOD captures carry a URL and capture date in their own file headers. The Rowley, Honig, Endrew F. and Fry PDFs each have a provenance file (Appendix C). Fry's URL was first NOT VERIFIED and was verified on 2026-10-21 (src/official/fry_15-497_provenance.txt).

Within-corpus keyword searches. These are logged in the text of my log and in counterpart CSV map rows; no single tally was kept, so the total is NOT RECORDED. Every search named in the log:

- Part 300 full text, terms "fundamental", "liberty", "least restrictive means", "rights of the parent" (federal_reviewer_log.md:183).
- Part 300 full text, "classification", "corporal", "handbook", "HIPAA", "cognitive" (federal_reviewer_log.md:197).
- "confinement", "isolation", "seclusion" (federal_reviewer_log.md:203).
- "99.38" and "November" (federal_reviewer_log.md:221).
- "compensatory services" in Part 300 (federal_reviewer_log.md:179).
- Restraint (DC-084) and burden (DC-094), keyword-only (federal_reviewer_log.md:142); restraint and seclusion rows (federal_reviewer_log.md:148).
- 5-A DCMR 3099 for "correctional/incarcerat/jail" (federal_reviewer_log.md:355).
- Utah burden search; the command is recorded in artifacts/federal/Federal_Schaffer_burden_leads_2026-10-22.md:52-53, and an earlier, broader search behind a withdrawn statement was not recorded (same file, line 51).
- Further keyword checks are recorded in counterpart map rows, for example NOTE K-1 (Federal_Counterparts_DC-273-279_2026-10-22.csv:17) and the DC-134 to 153 map rows (Federal_Counterparts_DC-134-153_2026-10-28.csv:23-41). They are not listed one by one here.

The Part 300 full-text file was used for keyword location only (KEYWORD-ONLY).

4A. Departures from PRISMA 2020 and PRISMA-S

Item	Departure	Reason
Databases and platforms (PRISMA-S 1-2)	None searched	The corpus is primary law and agency documents fetched from official hosts by known citation.
Full search strategies (PRISMA-S 8)	Web queries NOT RECORDED	The 2026-10-15 web searching was done by a worker and not logged.
Dates of searches (PRISMA-S 13)	Fetch times logged from 2026-10-21; 2026-10-15 captures have dates only	Per-file capture logging began on 2026-10-21.
Records identified, duplicates	Counts are log lines and files,	No search export exists; _v2

removed (PRISMA 2020 item 16a)	not records	recaptures sit beside earlier files.
Eligibility criteria (PRISMA 2020 item 5)	Host rule instead of study criteria	The rule is source authority (official host), set by the researcher.
Screening by two reviewers (PRISMA 2020 item 8)	Single reviewer, with a separate auditor bot	Team design: one bot per layer; peer review and Process Auditor audits.
Risk of bias (PRISMA 2020 items 11, 18)	Not applicable	Legal texts are not studies; source authority and text fidelity are checked instead.
Synthesis (PRISMA 2020 items 13, 20)	Coding and counterpart status, not meta-analysis	The question is documentary and legal, not effect sizes.
Peer review of search (PRISMA-S 12)	Not done for searches	Search strings were not kept; quotes were checked by script and audit instead.
Protocol and registration (PRISMA 2020 item 24)	No registered protocol	Briefs and directives in the project folder serve as the working protocol.

5. Documents held (APA 7)

Government documents and cases are listed by the official copy held. Agency guidance is agency guidance, not law. Items resting only on Cornell LII copies are listed separately as UNRESOLVED and are not evidence.

5.5 Held but UNRESOLVED (Cornell LII copies, not evidence)

- U.S.C. copies: 20 U.S.C. §§ 1232g, 1401, 1412, 1414, 1415, 1417, 6311, 6312; 42 U.S.C. §§ 671, 675 (superseded in use by the govinfo captures above).
- Case copies: Arlington, Burlington, Endrew F., Forest Grove, Fry, Honig, Rowley, Schaffer, Winkelman. Burlington, Forest Grove and Winkelman have no official copy in the corpus and remain UNRESOLVED.

6. Leads

Absence is a lead only. These are open questions, not findings.

1. Whether the D.C. Department of Youth Rehabilitation Services acts as a participating agency for IDEA purposes in the DC rows: UNRESOLVED (see the DYRS handbook rows, for example Federal_Counterparts_DC-114_126-133_2026-10-22.csv:8).
2. Adults in prisons and the D.C. Jail: the scope of 34 C.F.R. 300.102(a)(2) set beside 5-A DCMR 3001.16-17 and the Letter to Yudien; narrowed, not closed (federal_reviewer_log.md:355).
3. The Letter to Yudien date: the text layer reads 2008 while the host page and URL say 2003 (src/CAPTURE_LOG_guidance.txt:20). The reading of 2008 as a misread is INFERENCE.
4. Off-by-one ACYF-CB-PI-10-11 pins in an NV note (audit/handoff/federal/OPEN_FIXES.md:13).
5. Reporter citations for Endrew F. and Fry, and official copies of Burlington, Forest Grove and Winkelman.
6. Whether states may set the burden of proof differently from Schaffer (Federal_Schaffer_burden_leads_2026-10-22.md; the Utah statement stays UNRESOLVED).

7. Conflicts recorded within DC documents in the 2026-10-28 batch, such as records periods of 2 business days against 48 hours, and who appoints a surrogate (federal_reviewer_log.md:364). Recorded, not resolved.

7. Limitations

- On 2026-10-15 I delegated almost all reading to a background worker and relayed its summaries as confirmed. After the researcher's correction those items were reclassified UNVERIFIED (federal_reviewer_log.md:47-48). Log lines 1 to 46 are that worker's text.
- Web searches were not logged, and the 2026-10-15 captures have no per-file fetch log.
- No database or Lexis search; some cases rest only on Cornell copies and are UNRESOLVED.
- Some reads are partial or keyword-only; the depth is recorded per row but not totaled.
- On 2026-10-22 some time stamps were typed by hand ahead of the file write (OPEN_FIXES.md:27).
- UPDATE12 was edited in place; the edits are recorded append-only at federal_reviewer_log.md:160-166.
- Single reviewer for the federal layer; the Process Auditor's checks are the second look.
- Two MEANING FLAG items (AWF) on my rows are open (section 8).
- File modification times in the corpus show 2026-10-25 and do not show original write times; the cause is UNRESOLVED.
- Supreme Court case reading covered holding passages in context, not each opinion in full (Federal_Cases_official_2026-10-22.md, Limits).

8. Handoff

The handoff package is audit/handoff/federal/: README.md, MANIFEST.tsv, VERIFIED_STATE.md, OPEN_FIXES.md, OPEN_QUEUE.md and STANDING_RULES.md, written by the Process Auditor. OPEN_FIXES.md lists 18 items (OPEN_FIXES.md:39).

Open AWF flags on my rows (both NOT CLEARED under corrections entry R-1):

- Item 1: DC-143 col 6 [QRG:18], omitted tail "and other significant parties." (OPEN_FIXES.md:7, :44).
- Item 12: DC-260 col 6 [S42:22], omitted renewal conditions at S42.ocr lines 22-23 (OPEN_FIXES.md:21, :45).

Other open items: pinpoint items 2, 3, 5, 6, 7, 8, 9, 13, 14 and 15; notes for IDA 4, 10 and 11; open items 16 (21 against 22), 17 (UP-16 missing from the truncation scan output) and 18 (stamps ahead of writes) (OPEN_FIXES.md:8-27).

Held fixes. An IDA note of 2026-10-28 16:40 UTC (09:40 PDT) passed on four fixes and said not to act until IDA wakes me: add the DC-260 renewal conditions in an append-only note; name cfr_300.324_v2.txt for DC-261; delete /tmp copies of the backups after confirming the backups/ hashes; and add a working-directory note to BACKUPS_sha256.txt. They are NOT DONE and stay held, because this report's brief forbids corpus edits.

Also held: DC-154 to 231; UT UP-23 to 44 except UP-35; 2 C.F.R. part 300 and 45 C.F.R. 75.306 captures; the coding queue (audit/handoff/federal/OPEN_QUEUE.md).

Verification note. On 2026-10-28 between 22:00 and 22:02 UTC (15:00 to 15:02 PDT) each DOI above was looked up at api.crossref.org/works/<doi>; titles, journals, volume, issue, article numbers or pages, years and author lists match the Crossref records. PRISMA 2020 has 26 authors in Crossref; the list follows APA 7 (first 19, ellipsis, last). For PRISMA-S, Crossref lists 41 author entries: the 7 named authors, the PRISMA-S Group, and the group's members; the byline above gives the named authors and the group. Crossref gives only the first page (83) for Hutchinson and Duncan, so no last page is given. Crossref gives no BMJ volume number, so none is given; the volume is UNRESOLVED. The books were checked at openlibrary.org: Charmaz 2006 (work OL4460998W; editions OL8030713M and OL8030714M, Sage, January 27, 2006) and Lincoln and Guba 1985 (work OL16480181W; edition OL2863384M, Sage Publications, Beverly Hills, Calif.). Saldaña (2016), used in the model report, is not cited because Open Library's third-edition record could not be confirmed cleanly.

Appendices: verbatim quotations with file:line pins

Each line below is copied byte for byte from the named file, prefixed with its path and line number. Nothing inside the code blocks is my prose. Em dashes that appear inside these blocks are in the source files (9 occur in federal_reviewer_log.md: 8 at lines 2, 7, 15, 18, 22, 24, 30 and 37, which a background worker wrote on 2026-10-15, and 1 at line 210 inside a quotation of a federal regulation). Times printed as "PST" on 2026-10-15 are UTC minus 8 as written; section 2 gives the correct PDT.

Not quoted, for privacy or confidentiality: my check-in file (audit/checkin/), rules_audit.md, the researcher's rules files, Design Memo #3, and any personal or case material. Those are described in prose where needed and are not in this repository. Withheld by pin: federal_reviewer_log.md:80 (it describes the researcher's private rules files) and project-root status.md:87 (left out of Appendix D for the same reason).

Vaden, issued Dec. 22, 2020 (hearing Dec. 15, 2020); Petitioner (an adult student) v. D.C. Department of Youth Rehabilitation Services (DYRS).
artifacts/federal/federal_reviewer_log.md:39: URL (fetched PDF, saved at src/DC_HOD_2020-0181.pdf and .txt): https://osse.dc.gov/sites/default/files/dc/sites/osse/publication/attachments/HOD%20December%202020%20%287%29.pdf . Listing page: https://osse.dc.gov/publication/december-2020-hearing-officers-determinations (file "HOD December 2020 (7).pdf"; the identification of file (7) comes from a search result, and the PDF's own caption matches case no. 2020-0181).
artifacts/federal/federal_reviewer_log.md:40: What the HOD says (read pp. 10-14 of the PDF text; attribution is to the hearing officer, not to a court):
artifacts/federal/federal_reviewer_log.md:41: - The hearing officer cited 34 C.F.R. § 300.503(a) for the rule that written notice must be given a reasonable time before the public agency proposes to change the student's educational placement or the provision of FAPE, and § 300.520(a)(1)(i) for notice to the adult student and parents.
artifacts/federal/federal_reviewer_log.md:42: - The hearing officer found that DYRS placed the student at a residential school beginning April 4, 2019, and that the June 3, 2019 residential school IEP changed a fundamental component of the February 28, 2019 IEP (full-time special education). The hearing officer concluded the IDEA required prior written notice to the student and mother, and that DYRS, not DCPS, had to give it under the MOA because DYRS did not timely notify DCPS. DYRS did not give it to the mother.
artifacts/federal/federal_reviewer_log.md:43: - The hearing officer held the failure was a procedural violation that, under 34 CFR § 300.513(a)(2), could not be deemed a denial of FAPE (mother took part in the placement meetings; no evidence of impeded FAPE right or lost educational benefit).
artifacts/federal/federal_reviewer_log.md:44: - The hearing officer dismissed the claims about the residential school IEP and the PWN at the June 3, 2019 IEP meeting as brought against the wrong agency (DCPS, not DYRS, was responsible); the order denied all relief and dismissed the case.
artifacts/federal/federal_reviewer_log.md:45: Scope: an administrative hearing officer's decision on one record; not precedent for a court. Whether a court reviewed it is UNVERIFIED (the notice of right to appeal cites 20 U.S.C. § 1415(i), 90 days). Citations inside the HOD (e.g., Middleton, Z.B., Shaw) are UNVERIFIED here; IDEA Federal did not check them.

artifacts/federal/federal_reviewer_log.md:47: ## CORRECTION NOTE appended 2026-10-15 21:27 UTC / 13:27 PST (IDEA Federal, after researcher instruction)
artifacts/federal/federal_reviewer_log.md:48: All entries above were produced by a background worker, not by my own reading. Under the researcher correction they are reclassified UNVERIFIED, including the entries marked CONFIRMED or VERIFIED. Entries that rest on Cornell LII, search snippets, or recalled citations are also BLOCKED (official source not yet obtained). The quoted text of 34 C.F.R. 300.519(d) and 300.503(a) may well be correct, but I have not yet re-read the official eCFR text myself. The DC HOD 2020-0181 summary comes from a worker read of a captured PDF and is UNVERIFIED until I read the PDF myself. Original text above is left unchanged. Re-reads will be logged below with UTC and PST times.
artifacts/federal/federal_reviewer_log.md:49:
artifacts/federal/federal_reviewer_log.md:50: ## SELF RE-READ 2026-10-15 21:32 UTC / 13:32 PST (IDEA Federal, no worker)
artifacts/federal/federal_reviewer_log.md:51: Read myself, in full, the eCFR captures src/cfr_300.519.txt and src/cfr_300.503.txt (html capture carries eCFR data-hierarchy metadata, path /current/title-34/section-300.519 and 300.503; capture came from the earlier worker fetch, capture date 2026-10-15; I did not fetch it myself).
artifacts/federal/federal_reviewer_log.md:52: - 34 C.F.R. 300.519(d)(2)(i): the capture reads "Is not an employee of the SEA, the LEA, or any other agency that is involved in the education or care of the child;". This matches the quote logged above. Status: matches the eCFR capture on my own read; currency date of the capture not independently confirmed by me.
artifacts/federal/federal_reviewer_log.md:53: - 34 C.F.R. 300.503(a): the capture reads as quoted in the entry above; (1) and (2) match; (b) lists seven items and (c) addresses understandable language. Status: matches the eCFR capture on my own read.

artifacts/federal/federal_reviewer_log.md:54: - Limit: I read the saved capture. I did not re-fetch eCFR myself, and I did not check amendment dates myself. The amendment dates in the earlier entries (2016-12-19) remain worker-reported and UNVERIFIED.
artifacts/federal/federal_reviewer_log.md:55: - Not yet read by me: all other cfr_*.txt captures, usc*.txt (Cornell, unofficial, BLOCKED), case texts (Cornell, unofficial, BLOCKED), DC HOD, and the three guidance captures.
artifacts/federal/federal_reviewer_log.md:56:
artifacts/federal/federal_reviewer_log.md:57: ## SELF READ: OSEP Dear Colleague Letter, Dec. 5, 2014 (correctional facilities) 2026-10-15 21:45 UTC / 13:45 PST
artifacts/federal/federal_reviewer_log.md:58: Source file: src/OSEP_DCL_Correctional_Facilities_2014-12-05.txt, a browser capture (capture date 2026-10-15) of https://sites.ed.gov/idea/files/idea-letter.pdf, an official ed.gov host. I read all 20 letter pages and the resources page myself, line by line, with no worker. I did not compare the text capture against the PDF image. Signatories as printed: Melody Musgrove, Director, OSEP, and Michael K. Yudin, Acting Assistant Secretary, OSERS.
artifacts/federal/federal_reviewer_log.md:59: What the letter says that bears on the checklist (attribution is to the Department, not to a court; the letter is guidance, not a regulation):
artifacts/federal/federal_reviewer_log.md:60: - Footnote 10 states that 34 CFR 300.102(a)(2)(i) addresses ages 18 through 21 in adult correctional facilities and that 300.324(d) covers students convicted as adults and incarcerated in adult prisons. This agrees with the errata I sent (300.324(d) is adult prisons; 300.102(a)(2) is the adult-corrections exception). The letter's own page 5 note says "(34 CFR §300.324(d)(1)(ii))" for transition in adult prisons (footnote 30).
artifacts/federal/federal_reviewer_log.md:61: - The letter names 300.154(a) as the source for the interagency agreement requirement (three required subjects: financial responsibility with reimbursement terms, dispute resolution, coordination and delivery of services) and 300.154(b)(2) for LEA or State agency fallback payment with reimbursement claims.
artifacts/federal/federal_reviewer_log.md:62: - Surrogate parents: the letter cites 300.519(a), (b), (c), (d), (e), (g), (h) and states the 30-day reasonable-efforts duty falls on the SEA. It says a correctional facility may not act as the parent. Its statutory cite for unaccompanied homeless youth is printed "42 U.S.C. §11434(a)(6)", while the eCFR capture of 300.519(a)(4) prints "42 U.S.C. 11434a(6)". The two differ; I have not checked the U.S. Code myself.
artifacts/federal/federal_reviewer_log.md:63: - Records: new agency must take reasonable steps to obtain records and the previous agency must respond (300.323(g)); FERPA exception cited as 34 CFR 99.31(a)(2) and 99.34 (footnote 23). The letter says 99.31(a)(2) is the exception most relevant to records going to a facility.
artifacts/federal/federal_reviewer_log.md:64: - Notice: PWN under 300.503 and procedural safeguards notice under 300.504, and 300.520(a)(1)(i), reach parents of students in facilities.
artifacts/federal/federal_reviewer_log.md:65: Candidate inconsistencies inside the letter (internal, not mine): footnote 29 refers to "fn. 11" for the 18 to 21 exception, but that discussion is in footnote 10 on the capture; footnote 28 cites 300.324(d)(2) for the security modification while footnote 10 describes the modification as the third item of 300.324(d). I did not resolve these against the regulation yet; I will re-read 300.324 myself first.
artifacts/federal/federal_reviewer_log.md:66: Not established by this read: whether this letter has been superseded or rescinded (the capture header says the landing page was last modified Oct. 24, 2023, which I did not independently check). Unresolved.
artifacts/federal/federal_reviewer_log.md:67:
artifacts/federal/federal_reviewer_log.md:68: ## SELF READ: 34 CFR 300.324 and 300.102, eCFR captures 2026-10-15 21:52 UTC / 13:52 PST
artifacts/federal/federal_reviewer_log.md:69: Read myself, in full: src/cfr_300.324.txt and src/cfr_300.102.txt (eCFR html captures; I did not re-fetch). Capture footers show 300.324 "[71 FR 46753, Aug. 14, 2006, as amended at 82 FR 29761, June 30, 2017]" and 300.102 "as amended at 82 FR 29759, June 30, 2017".
artifacts/federal/federal_reviewer_log.md:70: - 300.324(c) is titled "Failure to meet transition objectives": (c)(1) a participating agency other than the public agency fails to provide transition services in the IEP, and the public agency must reconvene the IEP

Team to identify alternative strategies. This supports the errata that the transition-failure rule is 300.324(c).
artifacts/federal/federal_reviewer_log.md:71: - 300.324(d) is titled "Children with disabilities in adult prisons": (d)(1) lists requirements that do not apply (general assessments; transition under 300.320(b) for those whose eligibility ends by age before release eligibility); (d)(2) allows IEP Team modification of IEP or placement on a demonstrated bona fide security or compelling penological interest, with 300.320 and 300.114 not applying to those modifications. It applies only to children convicted as adults and incarcerated in adult prisons. Supports the errata.
artifacts/federal/federal_reviewer_log.md:72: - 300.102(a)(2) concerns children aged 18 through 21 and incarceration in an adult correctional facility: (i) exception where State law does not require services for those not identified and without an IEP in the last placement before incarceration; (ii) exception does not apply if identified and served under an IEP who left school before incarceration, or identified without an IEP in last setting. Supports the errata that 300.102(a)(2) is the adult-corrections age exception. Note (a)(3)(iii): graduation with a regular diploma is a change in placement requiring written prior notice under 300.503.
artifacts/federal/federal_reviewer_log.md:73: - The OSEP 2014 letter footnotes 10 and 28 are consistent with this text. The letter's footnote 29 cross-reference to "fn. 11" appears to be a letter-internal mismatch (the discussion is in footnote 10); unresolved and not mine to correct.
artifacts/federal/federal_reviewer_log.md:74: - Status: errata items 1 and 2 (300.324(c)/(d); 300.102(a)(2)) now match the eCFR captures on my own read. Errata items on 300.155/.149/.154 and FERPA 99.31 vs 1232g(b)(1)(L) are NOT yet re-read by me. Official U.S.C. text for 1232g is BLOCKED pending IDA's uscode.house.gov capture.

artifacts/federal/federal_reviewer_log.md:76: ## STATUS RECLASSIFICATION 2026-10-15 22:25 UTC / 14:25 PST (IDEA Federal)
artifacts/federal/federal_reviewer_log.md:77: Researcher correction relayed by IDA: secondary sources such as Cornell LII may supplement but are never the primary or only source for any item. Applied:
artifacts/federal/federal_reviewer_log.md:78: - Items resting only on Cornell LII copies (src/usc*.txt for 20 USC 1401, 1412, 1414, 1415, 1417, 1232g, 20 USC 6311, 6312, 42 USC 671, 675; src/ case texts for Schaffer, Forest Grove, Arlington, Winkelman, Burlington; and any checklist row whose only statutory or case source was a Cornell page) are UNRESOLVED. Official capture needed: uscode.house.gov or govinfo.gov (U.S. Code), supremecourt.gov or loc.gov U.S. Reports, or Lexis.
artifacts/federal/federal_reviewer_log.md:79: - Rowley, Honig, Endrew F. now have official captures in src/official/ (loc.gov for Rowley and Honig; supremecourt.gov slip opinion for Endrew F.). I have not yet read them myself, so they remain UNVERIFIED until I do. Fry: official source URL unresolved. Reporter cites for Endrew F. (580 U.S. 386) and Fry (580 U.S. 154) were from memory in IDA's provenance files and the earlier worker pass; they are UNRESOLVED and are not to be used until read from an official page.

artifacts/federal/federal_reviewer_log.md:142: File: Federal_Counterparts_UT_NV_DC_2026-10-21_UPDATE12.csv, sha16 349a81a3add3dbed. 18 rows: DC-081 to DC-097 plus 3001.16-17 (IDA request). PARTIAL 8, SUPPLIED 6, NONE FOUND 4 (two keyword-only: DC-084 restraint, DC-094 burden). New captures: 300.45, 300.151, 300.152, 300.153 (read: 300.45, 300.153); full Part 300 for keyword search only. All quotes verified against src files. Schaffer (DC-094) UNRESOLVED, no official copy. Batches 3-4 (DC-098 to DC-125, 300.208, .156/.138, .115(b)(1), .306(b), FERPA, .33 respondents) not yet done.

artifacts/federal/federal_reviewer_log.md:144: ## Ruling noted and line map (2026-10-22T02:17:28Z / 2026-10-21 19:17 PDT)
artifacts/federal/federal_reviewer_log.md:145: Researcher's ruling, as relayed by IDA (about 01:10 UTC): a read counts as full only when its quotes carry src line numbers and verify against the captured file. From now on every quote carries file:line. Quotes that drop words use an ellipsis, and altered text uses brackets (APA 7). Created UPDATE12_quote_line_map_2026-10-22.md (sha16 f945186e37ee0c0b). It line-maps every UPDATE12 batch 1-2 quote, plus the three items the Process Auditor marked UNRESOLVED (the DC review, 42 U.S.C. 672 and 45 CFR 1355.20). Correction note: the DC-086 and DC-088 CSV quotes join list lines; the verified item-by-item form is in the map.

artifacts/federal/federal_reviewer_log.md:147: ## UPDATE12 batch 3 (2026-10-22T02:18:23Z / 2026-10-21 19:18 PDT)
artifacts/federal/federal_reviewer_log.md:148: Appended 6 rows (DC-098, DC-099, DC-101, DC-102, DC-103, DC-104) to Federal_Counterparts_UT_NV_DC_2026-10-21_UPDATE12.csv, now sha16 cd7e5f0f95714c50, 24 rows. PARTIAL 4 and NONE FOUND 2; both NONE FOUND rows (restraint, seclusion) are keyword-only. DC-100 was answered earlier (UPDATE10). New capture: 300.536 (read in full). Line-cite key for these rows: [530:n] =

src/cfr_300.530_v2.txt line n; [536:n] = src/cfr_300.536_v2.txt; [3043:n], [3044:n], [3045:n] = reviews/DC/raw/5-A30xx_text_20261022.txt. Every bracketed quote was checked by script against the cited lines; 0 mismatches.

artifacts/federal/federal_reviewer_log.md:150: ## UPDATE12 batch 4a (2026-10-22T02:19:51Z / 2026-10-21 19:19 PDT)
artifacts/federal/federal_reviewer_log.md:151: Appended 9 rows (DC-105 to DC-113) to Federal_Counterparts_UT_NV_DC_2026-10-21_UPDATE12.csv, now sha16 b9b01cbc87443cc2, 33 rows. New captures, all read in full where cited: 300.114, .300 (para (c) only), .303, .306, .310, .323, .34 (paras (a) and (c)(5) only), .106. Line-cite key: [NNN:n] = src/cfr_300.NNN_v2.txt line n, except [115:n] = src/cfr_300.115.txt; [30xx:n] = reviews/DC/raw/5-A30xx_text_20261022.txt. Each quote was checked by script against a cited line range in its row; 0 failures after one cite was added to DC-113. DC-108 also rests on a keyword-only search of the full Part 300 ("licensed physician").
artifacts/federal/federal_reviewer_log.md:152: Correction (2026-10-22T02:20:00Z / 2026-10-21 19:20 PDT): in DC-108 and DC-109 the source cells for 300.34 and 300.300 originally said "read in full". They now state the paragraphs actually read (300.300(c), lines 22-28; 300.34 lines 2 and 21). The CSV was created in this session, so it was corrected in place. sha16 now a3d1ffa82f3e75d6.

artifacts/federal/federal_reviewer_log.md:155: Appended 10 rows (DC-115 to DC-121 and DC-123 to DC-125) to Federal_Counterparts_UT_NV_DC_2026-10-21_UPDATE12.csv, now sha16 5d470b433409e05e. New captures: 300.105, .108, .131, .156, .305, .502 (lines 1-13 relied on), .503 (para (a) only), .512, .641; all read in full except where noted. Line-cite key as for batch 4a. Each quote was checked by script against a cited line range; 0 failures (the one flagged string is a keyword search term, not a quote). DC-119 is keyword-only. With DC-100, DC-114 and DC-122 answered earlier, DC-081 to DC-125 are now all answered.

artifacts/federal/federal_reviewer_log.md:157: ## UJ-81/82 counterparts (2026-10-22T02:22:41Z / 2026-10-21 19:22 PDT)
artifacts/federal/federal_reviewer_log.md:158: Created Federal_Counterparts_UT_UJ81-82_2026-10-22.csv (sha16 e7efbc27ac6f5f8a), 2 rows, both PARTIAL. Federal sources: 300.151, .152, .153 and .506, read in full; 300.507(a) for contrast. UT text: reviews/UT/captures/USBE_RulesSpecialEducationReport_captured_20261021T233431Z.layout.txt, lines 4951-5315, which I read in full. Line-cite key: [UT:n] = that layout file at line n (rg/awk numbering, split on newline only); [15x:n] and [506:n] = src/cfr_300.15x_v2.txt and src/cfr_300.506_v2.txt. Each quote was checked against its cited range; 0 failures after two range cites were widened to span wrapped lines. Recorded disagreement, not resolved: IDEA Utah reads IV.F.2 as limiting the parties to the LEA or other public agency and a parent or adult student, but the UT verb is "may include". Note on method: the earlier checks split lines with Python splitlines(); I confirmed it gives the same numbering as split on newline for every DC and federal file cited in UPDATE12, so no earlier line cite shifts.
artifacts/federal/federal_reviewer_log.md:159:
artifacts/federal/federal_reviewer_log.md:160: ## Append-only record of in-place edits to UPDATE12 (recorded 2026-10-22T02:23:19Z / 2026-10-21 19:23 PDT)
artifacts/federal/federal_reviewer_log.md:161: I edited Federal_Counterparts_UT_NV_DC_2026-10-21_UPDATE12.csv in place. The project rule is append-only, and IDA has flagged the edit; this note is the full record. I can recover the original text exactly: the edit was a scripted string replacement, and the old strings below are its literal arguments.
artifacts/federal/federal_reviewer_log.md:162: - When: between the batch 4a append (CSV sha16 b9b01cbc87443cc2, logged 2026-10-22T02:19:51Z) and the next sha16 a3d1ffa82f3e75d6 (logged right after, about 02:20Z / 19:20 PDT). I did not record a separate timestamp for the edit itself.
artifacts/federal/federal_reviewer_log.md:163: - Row DC-109, column federal_counterpart_text_read, segment ORIGINAL: "34 CFR 300.300 (src/cfr_300.300_v2.txt, read in full)". NEW: "34 CFR 300.300 (src/cfr_300.300_v2.txt, para (c) read, lines 22-28; rest of section not read)".

artifacts/federal/federal_reviewer_log.md:164: - Row DC-108, column federal_counterpart_text_read, segment ORIGINAL: "34 CFR 300.34 (src/cfr_300.34_v2.txt, read in full)". NEW: "34 CFR 300.34 (src/cfr_300.34_v2.txt, para (a) line 2 and (c)(5) line 21 read; rest of section keyword-located only)".
artifacts/federal/federal_reviewer_log.md:165: - Reason: the original cells overstated the read. I read only those paragraphs, so "read in full" was not true.
artifacts/federal/federal_reviewer_log.md:166: - The batch 4a sha16 b9b01cbc87443cc2 is the pre-edit file, but I kept no copy of it. All later edits have been and will be appends only.

artifacts/federal/federal_reviewer_log.md:174: Created Federal_item3_leftovers_DC_2026-10-22.md (sha16 1f296f451838c4f8). artifacts/federal/federal_reviewer_log.md:176: ## DC-232..250 and UP-11 (2026-10-22T03:18:57Z / 2026-10-21 20:18 PDT)
artifacts/federal/federal_reviewer_log.md:177: Created Federal_Counterparts_DC232-250_UP11_2026-10-22.csv (sha16 697e4499fa834552), with 20 rows: PARTIAL 18, NONE FOUND 2 (DC-239 by read and keyword; UP-11 in Part 300 by keyword, and PARTIAL against 42 U.S.C. 675(1)). The quote check passed 85 of 85: each federal quote sits inside its cited line, and each DC or UT quote inside its cited line in S33.ocr.txt, S34.txt, S36.txt or UC_80-3-307. Row source and checker: src/u13/rows.py and src/u13/build.py. New captures: 300.111, .116, .325, .146, .301, .520, .154, .600 (eCFR 2026-10-13, HTTP 200). I read Utah 80-3-307 L34-L262 in full myself.
artifacts/federal/federal_reviewer_log.md:178: - Pin discrepancy in IDEA DC's matrix, recorded and not edited: in S33.ocr.txt, the DC-236 condition sentence ("DCPS is the LEA for District of Columbia resident children ...") is at lines 63-64, not lines 190-208. My DC-232 quote of "enrolled in a public school outside of the District of Columbia" is pinned to scope lines 35-37.
artifacts/federal/federal_reviewer_log.md:179: - Correction for the comparison, recorded and not edited: DC-247 says no CFR counterpart for compensatory education, but 300.151(b)(1) names "compensatory services" (the only hit in Part 300, a keyword result).
artifacts/federal/federal_reviewer_log.md:180: - Limits: I did not re-read the MOA, AI CFSA-15-1 or the Charles H. agreement in full. I checked only the strings I quote against IDEA DC's captured text.

artifacts/federal/federal_reviewer_log.md:182: ## UP-12 and UP-13 (2026-10-22T03:20:24Z / 2026-10-21 20:20 PDT)
artifacts/federal/federal_reviewer_log.md:183: Created Federal_Counterparts_UP12-13_2026-10-22.csv (sha16 79d62428dadd36d6), 2 rows, both PARTIAL. The quote check passed 17 of 17 (src/u13/rows_up.py, build_up.py). I read Utah 80-2a-201 L34-L109 and 80-4-104 L34-L93 in full myself. Federal sections read in full: 300.30, 300.300, 300.519. Keyword searches (keyword-only): "fundamental" (1 hit, unrelated), "liberty" (0 hits), "least restrictive means" (0 hits), "rights of the parent" (2 hits, 300.300(a)(2)(ii)-(iii)). No UP-12 or

UP-13 JSON row was on file in reviews/UT/proposed_rows, so these rows are drawn from the captures alone.

artifacts/federal/federal_reviewer_log.md:185: ## NV-L2-109 to 162 (2026-10-22T03:22:30Z / 2026-10-21 20:22 PDT)
artifacts/federal/federal_reviewer_log.md:186: Created Federal_Counterparts_NV-L2-109-162_2026-10-22.csv (sha16 4d087e40b5b2ae33). It has 6 grouped rows, one for each policy cluster (300.01, 300.03, 300.06, 400.06, 500.04, 500.13), and covers all 54 NV rows: PARTIAL 4, NONE FOUND 1 (300.06, keyword), and mixed 1 (400.06). The quote check passed 37 of 37 against the federal captures and the NV texts in NV/jj/sources/L2 (src/u13/rows_nv.py, build_nv.py). I read only the NV lines I cite, not the whole policies. New captures: 300.229 and 300.322 (HTTP 200).
artifacts/federal/federal_reviewer_log.md:187: - Capture-log note: my first two calls passed bare section numbers ("229" and "2"). They returned HTTP 404 and wrote the stub files src/cfr_229_v2.{xml,txt} and src/cfr_2_v2.{xml,txt}, which are logged at 03:20:46Z. The stubs are not sources. I kept them and did not delete them. 300.2 was already on file as cfr_300.2_v2.
artifacts/federal/federal_reviewer_log.md:188: - Focus items: 324(d) and 149(d) reach only youth convicted as adults in adult prisons, so on their face they do not apply to DCFS juvenile facilities (INFERENCE). 323(e)/(f)/(g) and 229(c) bear on 500.04 V.F. Whether Nevada adopted 229(a) or 520(a)(2) is UNRESOLVED. 2(b)(1)(iv) brings the facilities within Part 300. 101(a) is set against the 300.03 V.A.4 education right.
artifacts/federal/federal_reviewer_log.md:189: - GA-14 analogue: per IDEA Nevada's NV-131 row text, NAC 388.283 carries a 30-day term. I have not read it, so that is reported, not verified.
artifacts/federal/federal_reviewer_log.md:190: - Not done this batch: I did not re-read 300.530-536 or 300.322 beyond lines 1-4. Both are marked UNRESOLVED in the rows.

artifacts/federal/federal_reviewer_log.md:192: ## Cases from official sources (2026-10-22T03:24:09Z / 2026-10-21 20:24 PDT)
artifacts/federal/federal_reviewer_log.md:193: Created Federal_Cases_official_2026-10-22.md (sha16 43f29d5f078fd465). It covers Schaffer, Arlington, Endrew F. and Fry, all from supremecourt.gov (bound volumes 546 and 548, plus the 2016-term slip opinions). The quote check passed 7 of 7. LEXIS_QUEUE needs nothing. I read the holding passages in context, not each opinion in full.
artifacts/federal/federal_reviewer_log.md:194:
artifacts/federal/federal_reviewer_log.md:195: ## NV append A (per-row map) and B (updates) (2026-10-22T03:26:07Z / 2026-10-21 20:26 PDT)
artifacts/federal/federal_reviewer_log.md:196: Appended to Federal_Counterparts_NV-L2-109-162_2026-10-22.csv (sha16 4d087e40b5b2ae33 before, ef2fc8c2346f2339 after). A byte-prefix check confirmed the original content was left unchanged.
artifacts/federal/federal_reviewer_log.md:197: - Append A: one MAP line for each of the 54 rows NV-L2-109..162, giving its group and its federal provision(s), or "no counterpart within group" with the method. New keyword-only searches (Part 300 full): "classification" 0 hits, "corporal" 0, "handbook" 0, "HIPAA" 0, "cognitive" 9 (none on point). Where a line says "no keyword search", the method was a comparison against the group's federal sections.
artifacts/federal/federal_reviewer_log.md:198: - Append B: I read 300.530-300.536 and 300.322 in full (300.531-534 captured this batch, HTTP 200), then wrote 3 update rows. The quote check passed 27 of 27.
artifacts/federal/federal_reviewer_log.md:199:   - NV-L2-122: PARTIAL.
artifacts/federal/federal_reviewer_log.md:200:   - 300.13 rows NV-L2-077, 083, 084: PARTIAL.
artifacts/federal/federal_reviewer_log.md:201:   - NV-L2-160: NONE FOUND, by a full read of 300.322.
artifacts/federal/federal_reviewer_log.md:202:   - NV-L2-161: PARTIAL.
artifacts/federal/federal_reviewer_log.md:203:   - Keyword-only: "confinement", "isolation" and "seclusion" have 0 hits each.
artifacts/federal/federal_reviewer_log.md:204: - NAC 388.283 30-day term: still reported, not verified (IDA is routing it to IDEA Nevada).
artifacts/federal/federal_reviewer_log.md:205: - Standing practice: any later grouped file will carry a per-row map.

artifacts/federal/federal_reviewer_log.md:207: ## 300.168 re-capture and diff (per IDA 03:26) (2026-10-22T03:28:17Z / 2026-10-21 20:28 PDT)
artifacts/federal/federal_reviewer_log.md:208: I re-captured 300.168 from eCFR (versioner 2026-10-13, HTTP 200) as src/cfr_300.168_v2.txt (sha16 59ce1b42a465b1ab). The earlier file is src/cfr_300.168.txt (sha16 cd4f40cb9ace3d88), left in place and not edited.
artifacts/federal/federal_reviewer_log.md:209: - Diff result: after removing blank lines and leading spaces, the two files are identical. The only difference is a missing final newline in v2.
artifacts/federal/federal_reviewer_log.md:210: - Line 6 of the old file reads in full: "... involved in, or concerned with the education of children with disabilities, including—". It is not truncated. The em dash belongs to the source text, and items (1)-(11) follow on lines 8-28.
artifacts/federal/federal_reviewer_log.md:211: - IDEA Georgia's lead (GA-82: "line 6 ends 'education of children with'") does not match the file as read. Recorded here, not resolved. A possible cause is display-width cutting (INFERENCE, unverified).
artifacts/federal/federal_reviewer_log.md:212: - The federal text is not Governor-only. It reads "appointed by the Governor, or any other official authorized under State law to make such appointments" (v2 line 2; 20 U.S.C. 1412(a)(21)(B), usc1412.txt line 325).

artifacts/federal/federal_reviewer_log.md:258:   - Keys appended to build_any.py (project and /tmp copies identical): UT, UT201, UT104 (from build_up.py and the UJ81-82 source), plus 672, 1355, GA248, NV501, UT512.
artifacts/federal/federal_reviewer_log.md:259:   - DC232-250: N-2 appended (sha16 8d1f57bf8512e2f2). The counts reconcile: the body gives 86 under v1 and 87 under v3 (DC-236 [33:2] now paired, matching the PA's 87); C-1 adds 2, for 89. The checker now reads 90 because N-2 quotes the DC-236 phrase.
artifacts/federal/federal_reviewer_log.md:260:   - UP12-13: the 5 failures were caused by missing keys UT201 and UT104. Now 17 verified, 0 failed.

artifacts/federal/federal_reviewer_log.md:293:   - src/u13 is now self-contained. Every '/tmp/u13' reference is replaced with the script's own directory. The DJJ path now points to src/u13/djjman_pdftotext-layout.txt, which is byte-identical to /tmp/u13/djjman.txt (cmp, sha256 44d4f1da...e608). rows_tmp_GA.py and rows_tmp_UT.py are copied in. I tested with /tmp/u13 renamed: check_csv.py on all 12 files gives the same counts, and trunc_scan.py, meaning_scan.py and check_csv_v1.py run. The build_*.py scripts were patched and syntax-checked but not re-run, so the counterpart files are not regenerated.

artifacts/federal/status.md:80: - (1) Federal_Counterparts_DC232-250_UP11_2026-10-22.csv: appended C-1 (DC-242 plural phrases at 324 line 32, singular at line 35). sha16 697e4499fa834552 -> 2a99ed57168c3bda.
artifacts/federal/status.md:81: - (2) Same file: appended N-1 checker note. New widened checker src/u13/check_csv.py (every cell; pin before or after). Before the appends: 86 verified, 0 failed, 30 unpinned. PA count 87 not reconciled. Today's four new files re-run: 13/23/17/34 verified, 0 failed.
artifacts/federal/status.md:82: - (3) CFR_CAPTURE_LOG_GA39_56.txt: appended full URL, HTTP 200 and full sha256 for 546bv.pdf and 548bv.pdf. A re-fetch matched the stored bytes.
artifacts/federal/status.md:83: - GA-89, GA-48 and NV 186-204 were already done at 03:37Z (see the entry above).

artifacts/federal/status.md:85: ## 2026-10-22T03:40:38Z (2026-10-21 20:40 PDT) IDA 03:38 item (B)

artifacts/federal/status.md:86: - Federal_Counterparts_UP16-20_2026-10-22.csv (sha16 da901b9c6da26df4): UP-16 PARTIAL; UP-17 SUPPLIED on its face vs 675(1)(G)(i); UP-18 PARTIAL (675(1)(B) not read); UP-19 SUPPLIED with one item PARTIAL (best-interest factors, transportation-cost rule and dispute rule not found in 6311/6312 as read; ED/HHS 2016 guidance not captured); UP-20 PARTIAL. ESSA is labeled a related federal baseline. Builder checker 56/56; widened checker run; map appended. ESSA was already captured from govinfo (CAPTURE_LOG lines 9-10). Item (A) was done at 03:38:37Z.
artifacts/federal/status.md:87:
artifacts/federal/status.md:88: - 2026-10-22 03:44 UTC (20:44 PDT): UP-18 U-1 appended to Federal_Counterparts_UP16-20 (HR4980 link KEPT; H.R. 4980 = Pub. L. 113-183 per govinfo PLAW header line 9; rights document is 42 U.S.C. 675a(b)(1)-(2), added by sec. 113(d), not 675(1)(B); 675a and PLAW-113publ183 captured from govinfo 03:41:16Z, HTTP 200). UP-19 U-1 appended: ED/HHS NRG June 23 2016 captured from acf.hhs.gov (redirect to acf.gov), sha256 a674eb14...eb6d, 28 pp, AGENCY GUIDANCE, NOT LAW; Q12 factors, line 530 transportation costs, lines 872-873 disputes match the flyer; ed.gov copies HTTP 403. File now 74 verified, 0 failed, 9 unpinned; sha16 4405d26f939ba7a6. New file Federal_Counterparts_GA-90-91_2026-10-22.csv (sha16 cc240f4d42470028): GA-90 NONE FOUND for an IDEA interagency team (method stated; Part 303 not searched), PARTIAL on LEA seat vs 300.321; GA-91 PARTIAL vs 300.111/300.301. 23/23 quotes verified at build; map present.
artifacts/federal/status.md:89: - 2026-10-22 03:44 UTC: correction to the entry above: the map rows were appended after the build (the builder does not write G); Federal_Counterparts_GA-90-91_2026-10-22.csv now sha16 fbc8f78d7ae9acba, 3 MAP rows.
artifacts/federal/status.md:90: - 2026-10-22T03:46:22Z (2026-10-21 20:46 PDT): Schaffer leads C-1 (UT burden search command recorded, undue-burden statement withdrawn, Title 80 hits listed, UT statement stays UNRESOLVED) and C-2 (Provo quote L294-296, not L104) appended; capture-log note for row 19 (300.168 .txt sha256 cd4f40cb...a172) appended.
artifacts/federal/status.md:91: - 2026-10-22 03:50 UTC (20:50 PDT): GA-90 U-1 appended (Part 303 captured from eCFR 03:47:05Z, 5087 lines; NONE FOUND for a local team; 303.600 State ICC is a different body); GA-90-91 file sha16 80df7988f4c39aa7, 28 verified. New Federal_Counterparts_GA-92-94_UP21-22_2026-10-22.csv (sha16 0e71c3dd595a2015): GA-92 PARTIAL vs 300.30(a)(3), (b)(2); GA-93 PARTIAL vs 300.323(e), (g), ESSA 6311(g)(1)(E) related baseline; GA-94 PARTIAL vs 300.613-.625, 99.31(a), (a)(9), 1232g(b)(1)(L) and (b)(2)(B) (99.31 has no caseworker or dependency text, keyword-only); UP-21 NONE FOUND (method stated), related 300.39(b)(1), 300.17(a); UP-22 PARTIAL vs 1232g(b)(1)(L), 99.31(a)(5)/99.38, (a)(9), 300.622(a). New eCFR captures: 300.17, .39, .613-.621, .624, .625.
artifacts/federal/status.md:92: - 2026-10-22 03:51 UTC (20:51 PDT): UP16-20 C-2 appended (APA ellipsis corrections for truncated quotes in UP-18 U-1 and UP-19 U-1, incl. [675a:29], [675:14], [PL183:603], [NRG16:530]; P300 col 5 split re-pinned to 1018-1019). Checker v2 (ellipsis-aware); trunc_scan.py added. Federal_Counterparts_UP16-20_2026-10-22.csv sha16 01d6427192f783e2. Queued: truncation scan of all earlier 2026-10-22 files.
artifacts/federal/status.md:93: - 2026-10-22T03:56:18Z (2026-10-21 20:56 PDT): IDA 03:53 items.
artifacts/federal/status.md:94:   - (1) Checker v3 (src/u13/check_csv.py) reads the pin list from the project copy src/u13/build_any.py and pairs pins across "(" or ")". v1 is kept as src/u13/check_csv_v1.py.
artifacts/federal/status.md:95:   - Keys appended to build_any.py (project and /tmp copies identical): UT, UT201, UT104 (from build_up.py and the UJ81-82 source), plus 672, 1355, GA248, NV501, UT512.
artifacts/federal/status.md:96:   - DC232-250: N-2 appended (sha16 8d1f57bf8512e2f2). The counts reconcile: the body gives 86 under v1 and 87 under v3 (DC-236 [33:2] now paired, matching the PA's 87); C-1 adds 2, for 89. The checker now reads 90 because N-2 quotes the DC-236 phrase.
artifacts/federal/status.md:97:   - UP12-13: the 5 failures were caused by missing keys UT201 and UT104. Now 17 verified, 0 failed.
artifacts/federal/status.md:98:   - UT_UJ81-82: the 18 failures were caused by the missing UT key. 1 real pin error remains: UJ-82 "State complaint" [UT:5293] should be [UT:5293-5294]. C-1 appended (sha16 f1f6737408ef6496). The checker now reads 2 failed, because C-1 quotes the wrong pin.
artifacts/federal/status.md:99:   - The UJ81-82 and UP12-13 files lack per-row map rows. Open.

artifacts/federal/status.md:100:   - (3) 672 file: C-3 appended. The recount gives 16 pinned source quotes in the body, all verified; the PA is right and my 14 was wrong. The NV 316-317 ellipsis is replaced by the joined form.
artifacts/federal/status.md:101:   - (4) A-1 appended: NV/welfare/sources/L2_NDE_ESSA_AB491.txt L96-110 (NDE slides, Aug 18 2017). They describe a WCSD-WCDSS MOU with "Transportation to School of Origin to be funded through Title IV-E (2017)" [103]. The federal hook is 675(4)(A) [675:38]. This does not change "no CW-JJ IV-E agreement captured" (INFERENCE: an education to child welfare transport MOU). The MOU text is not captured. 672 file sha16 dd6b97abc8bc6a40.
artifacts/federal/status.md:102:   - sha256 for the 675a and PL183 .htm/.txt captures appended to src/usc/CAPTURE_LOG.txt.
artifacts/federal/status.md:103: - 2026-10-22T03:56:53Z (2026-10-21 20:56 PDT): trunc_scan run over all 12 Federal_Counterparts_*2026-10-22.csv. Raw output in TRUNC_SCAN_raw_20261022T035653Z.txt; a mechanical filter dropping list-item ends (; and / ; or / dash / colon / comma) and next-is-punctuation leaves the flags in TRUNC_SCAN_review_20261022T035653Z.txt. Not yet reviewed by reading; a flag is not a finding (a phrase quote may end mid-sentence under APA 7). Row-by-row review open.
artifacts/federal/status.md:104: - 2026-10-22T04:01:14Z (2026-10-21 21:01 PDT): IDA 03:58 items.
artifacts/federal/status.md:105:   - Per-row maps appended: UJ81-82 (UJ-81 IV.E with 300.151-.153; UJ-82 IV.F with 300.506) and UP12-13 (UP-12, UP-13 with 300.30, .300, .519, plus "no counterpart within group" items and the method). Maps were appended before the M-1 notes.
artifacts/federal/status.md:106:   - Meaning-test scan. This replaces the end-truncation scan logged earlier; TRUNC_SCAN_* files are superseded and kept.
artifacts/federal/status.md:107:   - Tool: src/u13/meaning_scan.py.
artifacts/federal/status.md:108:   - Scope: the 18 Federal files dated 2026-10-22 (12 CSV, 6 MD).
artifacts/federal/status.md:109:   - Method: for each pinned quote that verifies, take the omitted text in the same clause before and after it (clause bounded by ". ", ";" or a subparagraph marker). Flag it when that text holds a negation, condition, exception or qualifier term and the qualifier is not already carried in the same cell.
artifacts/federal/status.md:110:   - Results: 510 quotes scanned; 131 machine candidates (MEANING_SCAN_candidates_20261022.txt), all read by me.
artifacts/federal/status.md:111:   - 21 quote instances in 16 row items have an omitted qualifier that bears on the comparison. 1 of them, DC-248, is possible (the clause it attaches to is UNRESOLVED).
artifacts/federal/status.md:112:   - Corrections appended as "MEANING NOTE M-1 (<row>)" in 7 files:
artifacts/federal/status.md:113:   - DC232-250: DC-237, -241, -248, -249.
artifacts/federal/status.md:114:   - GA-92-94: GA-93, GA-94.
artifacts/federal/status.md:115:   - NV-L2-109-162: NV-L2-129, -138, -077/083/084.
artifacts/federal/status.md:116:   - NV-L2-186-204: NV-L2-186, -199.
artifacts/federal/status.md:117:   - UP12-13: UP-13.
artifacts/federal/status.md:118:   - UP14-15: UP-15.
artifacts/federal/status.md:119:   - UJ81-82: UJ-81.
artifacts/federal/status.md:120:   - Every new quote in M-1 verifies (checker v3).
artifacts/federal/status.md:121:   - Limits: keyword-based triggers, so a qualifier phrased without a listed term is not caught. Unpinned quotes are not scanned. Older (pre-10-22) files are not scanned.
artifacts/federal/status.md:122:   - No ellipses were added in bulk.
artifacts/federal/status.md:123: - 2026-10-22T04:12Z (21:12 PDT): truncation review A-1 done (CORRECT 25, KEEP 197); Title 80 80-6-504 resolved (Schaffer C-2). Next: coding queue, 327 riders, TEAM_CONSOLIDATION briefing.
artifacts/federal/status.md:124: - 2026-10-22T04:12Z (21:12 PDT): correction to line 106: TRUNC_SCAN_* files are no longer superseded; IDA 03:59 reinstated the review file for one-by-one adjudication (A-1).
artifacts/federal/status.md:125: - 2026-10-22T04:08:33Z (2026-10-21 21:08 PDT): IDA 04:03 items done (M-3 notes, C-3, timestamp corrections, src/u13 self-contained). Next: coding queue.

artifacts/federal/src/CAPTURE_LOG_guidance.txt:18: NRG24 host match | captures/browser/NRG24_browser.pdf | fetched by IDA from the ed.gov URL in the NRG24 row above, about 2026-10-22T04:36Z (time per IDA; HTTP status not recorded by me) | sha256 5bd22db3451aa830833f29218562a39e5059f5b3b7105f0627013d7960118bff, 1359340 bytes, computed by me at 2026-10-22T04:42:14Z | identical to the PDF on file (row above). Hash match to host: CONFIRMED. The earlier FLAG (hash match UNRESOLVED) is cleared. The 2026-10-15 HTTP status stays NOT RECORDED.
artifacts/federal/src/CAPTURE_LOG_guidance.txt:19: CAP-YUD (supersedes NOT CAPTURED above) | OSEP Letter to Yudien | AGENCY GUIDANCE, NOT LAW | PDF captures/browser/Yudien_2003-08-19_browser.pdf from https://sites.ed.gov/idea/files/idea/policy/speced/guid/idea/letters/2003-3/yudien081903fape3q2003.pdf, about 2026-10-22T04:38Z (per IDA) | sha256 b2f965e9dcdaf704045fe23c2172c1f2b9e88348e19a3558ffcc49ae19a9e805 (122214 bytes; 3 pp; pdfinfo Creator Input Solutions, Inc., ModDate 2004-01-21, CreationDate blank) | TXT (pdftotext -layout, by me) captures/browser/Yudien_2003-08-19_browser.txt, 138 lines, sha256 9d98deef8a8502cb0c0101ed434ad9e83219179719bc6be1fd2818a25d44bf5c; read in full by me. P key YUD.
artifacts/federal/src/CAPTURE_LOG_guidance.txt:20:   Date discrepancy: the text layer reads "AUG 19 2008" [YUD:7]; the host page title says August 19, 2003, the URL path has 2003-3, and the PDF ModDate is 2004-01-21. INFERENCE: 2008 is a text-layer misread of a 2003 date stamp. The page image is not re-read by me (UNRESOLVED as to the image).
artifacts/federal/src/CAPTURE_LOG_guidance.txt:21:   Text-layer errors noted: "300.31 l(c)(1)" [YUD:21] for 300.311(c)(1); "a flee" [YUD:33] for a free. The letter cites pre-2006 regulation numbers (300.311(c)(1), 300.122(a)(2), 300.300(a)); current counterparts are 300.324(d)(2)(i), 300.102(a)(2) and 300.101(a) (INFERENCE from matching text, not from a derivation table).
artifacts/federal/src/CAPTURE_LOG_guidance.txt:22: Yudien page | captures/browser/Yudien_page.html | sha256 61af200efcee471792626859b6046720362b29b65d5a1fbcbf980770de97fd58 (136352 bytes) | RENDERED DOM saved by the browser, NOT the original HTML source. Title: POLICY LETTER:

August 19, 2003 to Vermont Department of Education Legal Counsel Geoffrey A. Yudien. The page also links a .doc version, not captured.

The text layer "AUG 19 2008" [YUD:7] is a text-layer error. This replaces the earlier INFERENCE (misread); the date is now read from the image, consistent with the host page title and URL path.
